

RRI-BIM SERIES: CORDLESS IMPULSE WRENCHES WITH AUTOMATIC SHUT-OFF

The RRI-BIM cordless shut-off impulse wrenches have a high tightening speed combined with good accuracy. No reaction forces during the tightening process and a rushless motor for long motor life and high efficiency. No tightening functionality when battery charge is low, thus process safety improves.

This series is very well suited in areas where cables and hoses impede handling flexibility of tools, such as interiors of cars, coaches and trains.

Characteristics:

- 18 Volt Lithium-Ion battery (choice for 2,0 Ah or 4,0 Ah capacity)
- Torque adjustable
- Non-contact trigger with 2 steps
- Fine-tuning on hardness of the joint, electronically
- LED status indicates: Reverse, OK, NG, Battery low
- Run-down speed up to 4500 RPM

The newest RRI-BIM65T is provided with a rubber cover around the handle for extra vibration reduction.

Now reaction free tightening to 65 Nm!
