

CORDLESS IMPULSE WRENCH NON SHUT OFF

POWERFUL, VERY ACCURATE AND NO KICK-BACK

The compact design of the YZ-NP range offers great accessibility to the joint. Tightening bolts M6 up to M10 with torque levels up to 65 Nm with very high speeds and remarkably low reaction forces. The Output Adjustment Dial offers 4 settings of motor output by the dial (2000, 3000, 4000, 4800 rpm) and the combination of adjustment of the relief valve and speed setting of the motor gives a great fit-for-purpose adaptation to the specific bolted joint. The YOKOTA non-shut off cordless impulse wrench is the perfect solution for applications where cables or hoses are disruptive. Pulse check function: By teaching the tool the impulse cycle as a reference point, the tool is able to give a warning message for upcoming maintenance needs.

CHARACTERISTICS

- Complete freedom of movement by use of batteries
- High speed fastening
- No Kickback
- Ergonomic design
- Electric (brushless) DC-drive
- Adjustable RPM
- Error LED indication for Overheat & Motor/driver errors and battery capacity warning

Battery 18V 2 AH
(BPL-1820)

Charger
(BC2075MX)

Have to be ordered separately.
